

Rural Health Transformation Program (RHTP)

Helping Rural Healthcare Organizations Turn Funding into Measurable Outcomes

ClinDCast's dedicated team has conducted multiple Rural Health Organization needs assessments, hosted RHTP focused webinars and attended state meetings across multiple locations. Through this hands-on engagement, ClinDCast understands the real RHTP requirements, operational challenges, funding priorities, and implementation requirements needed to successfully support the Rural Health Transformation Program.

ClinDCast RHTP Support

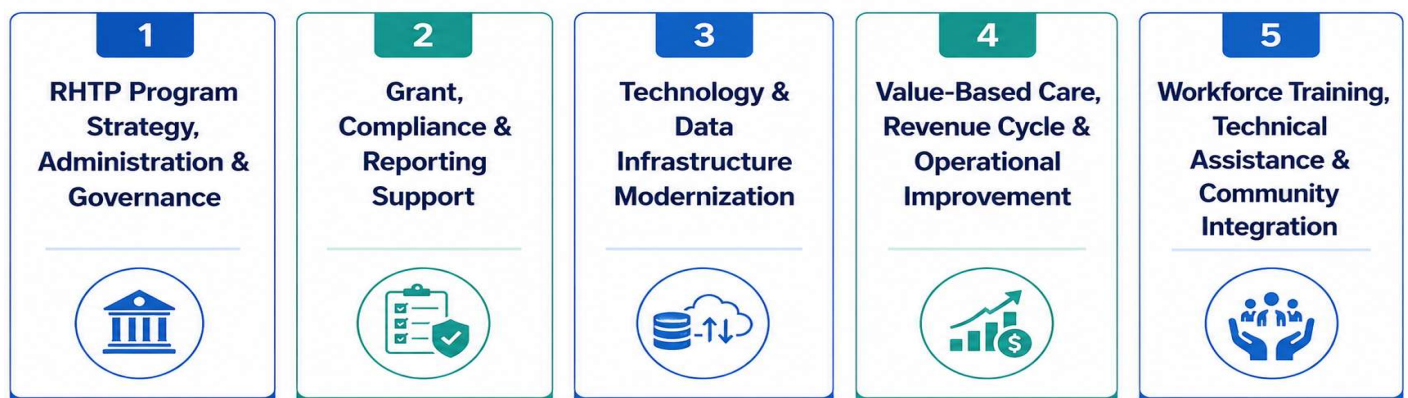

- HIE & ENS onboarding
- Paper Chart Digitization
- Remote Patient Monitoring
- Telehealth Platform
- AI Enabled Solutions
- Tele-specialty integration
- Secure communication workflows
- RHTP-Focused Support
- Reporting Readiness
- Value-based Dashboards
- Workforce Training
- Additional Services per need basis

RHTP Client Outcomes

- Expand rural access to care through telehealth, remote patient monitoring, tele-specialty integration, and secure communication workflows.
- Improve care coordination by enabling HIE/ENS onboarding, chart digitization, and better access to patient information across care settings.
- Strengthen RHTP reporting readiness
- Support value-based care performance through dashboards, analytics, AI-enabled insights, and measurable outcome tracking.
- Increase workforce efficiency through workflow optimization, staff training and automation

ClinDCast supports healthcare organizations, rural hospitals, clinics, health systems, and state partners with end-to-end Rural Health Transformation Program support

ClinDCast Rural Health Transformation Program (RHTP) Service Area

RHTP is a CMS led initiative providing \$50B over five years to help rural healthcare providers across all states to improve access, quality, workforce capacity, technology infrastructure, and sustainable care delivery.

Please contact ClinDCast today to discover how we can support your organization's RHTP Journey.
